

CALL FOR PAPERS

Introduction

In the context of a new global era marked by profound digital transformation, science, technology, and economics have become core drivers for promoting sustainable economic growth, enhancing national competitiveness, and addressing pressing societal challenges. In Vietnam, the spirit of Resolution No. 57-NQ/TW of the Politburo has explicitly affirmed the pivotal role of science, technology, and innovation as key catalysts in the nation's rapid, resilient, and sustainable development process.

To realize this strategic vision, Tay Do University is honored to organize the **International Scientific Conference on "Science, Technology, and Economics in the Digital Era" (STEC 2026)**, centered on the theme *"Innovating for Public Health and Sustainable Development"*. This conference serves as a premier academic platform bringing together scientists, medical experts, economists, lecturers, and industry leaders from Vietnam and across the globe. The event aims to foster multi-disciplinary dialogue, showcase breakthrough research, and share practical models that leverage digital technology, artificial intelligence, and innovative strategies to serve the community and advance sustainable development.

Conference theme

Innovating for Public Health and Sustainable Development

Organizer

Tay Do University, Can Tho City, Vietnam

Duration and venue

Duration: 04-05 December, 2026

Venue: Tay Do University, Can Tho City, Vietnam
